

# Digital Technologies Acceptable Use Agreement (for students)

## Introduction

Digital technology continues to create opportunities to learn and connect our school community. The school believes in using a digital citizenship model to support safe, responsible and ethical use of digital technology and online spaces as it helps our online environment to be a positive place for everyone.

This agreement outlines the school's role in promoting the use of digital technology and online spaces for learning, and supporting online safety approaches. It also outlines expectations and responsibilities of students as a member of our online community. It will also be used to support discipline processes when necessary.

## Definition

The school defines a successful digital citizen as an individual who;

- is a confident and capable user of ICT
- uses technologies to participate in educational, cultural, and economic activities
- uses and develops critical thinking skills in cyberspace
- is literate in the language, symbols, and texts of digital technologies
- is aware of ICT challenges and can manage them effectively
- uses ICT to relate to others in positive, meaningful ways
- demonstrates honesty and integrity in their use of ICT
- respects the concepts of privacy and freedom of speech in a digital world
- contributes and actively promotes the values of digital citizenship

## The School's Role

The school recognises a student's right to receive a high-quality education in a safe online and offline environment.

We will do this by:

- providing information and support to ensure you are aware of, and able to meet, your responsibilities
- providing you with a programme/session/advice that promotes positive online safety behaviours
- overseeing students' use of the school's digital platforms and resources

- offering access to online services that is not unreasonably restricted
- supporting students who need help dealing with online incidents
- taking action when a negative online experience occurs between students even if it takes place outside of school hours
- securing the personal information the school collects about you
- protecting your freedom of expression under law
- having a plan in place to support students when something serious or illegal happens. This might include getting in touch with the external agencies.

## Your Responsibilities

As a student of the school and a member of our community, it is expected that you will positively contribute towards making our school a place that is safe, respectful, and fair online and offline. This means enacting our school values in online spaces, and helping to shape a positive online culture. This is being a 'digital citizen'.

As a digital citizen, you will:

1. Keep it positive. Always respect others online and communicate in a constructive way. Do not create or publish content that is indecent, threatening or offensive.
2. Protect privacy. Do not disclose sensitive personal information about yourself or another person in any digital communication. This includes sharing passwords, accessing devices or online sites belonging to others without consent and taking screenshots and sharing this content without consent.
3. Act cautiously. Anything you post or do online can influence what people think of you. Likewise, always think carefully about whether the information you see online is true. If you are unsure of something, talk to a teacher.
4. Avoid online bullying. Creating or forwarding content that is harmful, inappropriate or hurtful is never okay at any time, and may breach legislation (Harmful Digital Communications Act). If you are harassing people by sending multiple messages this is also considered online bullying and is unacceptable.
5. Be security smart. Keep personal information safe and secure by using strong passwords and not sharing them with others. This includes not accessing devices or online sites belonging to others without consent, nor taking screenshots and on-sharing their personal content without their knowledge and permission.

6. Check consent. Before downloading software to the school network or onto devices, seek permission. Interfering with the school systems, digital technologies, equipment/network or the online security of another person is never permitted at any time.
7. Recognise others' work. Follow copyright and intellectual property requirements by attributing references, images, text, audio and video appropriately.
8. Respect the rights of others. Only record and share video, photo or audio content if the people in it know it has been taken and have provided their consent.
9. Use personal devices sensibly. Keep your device(s) on silent during school hours and only use it outside of class time unless you have been given permission to use it during lessons.
10. Seek help. Sometimes you or someone you know will feel unsafe or come across inappropriate or hurtful online content and behaviours. If this happens talk to a trusted adult about what can be done.

## Online Incidents

Despite the advantages technology offers and people's best intentions, sometimes there will be challenges and risks within an online community – either accidentally or on purpose. The school is committed to supporting you if something goes wrong online.

## Online bullying

Incidents of online bullying or harm will not be tolerated at the school. If you or somebody else is being bullied or harmed online, it's never okay at any time. This type of harm does not usually just go away. It's important to keep the evidence of what is happening to you or someone so this can be investigated. Don't put yourself at further risk by continuing any contact with the person or people who are bullying online, or creating harmful or hurtful content. It is very important to let your teacher or Dean at the school know what's happening so you can get the right help and support you need. You should also consider talking to a trusted adult like your parent, your whānau or guardian for support.

## Report a problem

You should report an online incident or if you suspect something is happening online as soon as you can to your teacher or Dean. Once the school is made aware of a problem, they will assess the problem and work to resolve it.

## Online safety support

Netsafe is an online safety organisation that is also available to help. They provide free confidential advice seven days a week for all online safety challenges. They can be contacted on 0508 638723 or online at [netsafe.org.nz](https://www.netsafe.org.nz)
